FAQ

Q: How do I care for my marble mosaic?

A: To care for your marble mosaic, follow the care and maintenance guide. Regular cleansing with a liquid cleanser with mild ingredients to remove mineral deposits and soap scum. Do not use abrasive cleaners, steel wool, scouring pads, scrapers, or sandpaper on any part of the surface.

To remove built-up soap scum or difficult-to-remove stains, use varnish thinner. If the stain is from hard water or mineral deposits, try using a cleaner to remove iron, calcium, or other such mineral deposits from your water supply. As long as the label directions are followed, most cleaning chemicals will not damage the surface of the marble.

Q: Could the scratches be removed if happened?

A: Yes, fine scratches can be removed with automotive paint buffing compound and a handheld polisher. A company technician should take care of the deeper scratches.

Q: How can I pay for the products?

A: T/T transfer is available, and Paypal is better for a small amount.

Q: Do you have agents in our country?

A: Sorry, we don't have any agents in your country. We will let you know if we have a current customer in your country, and you can work with them if possible.
